

Marianne Cooper

D.O.B 14/03/1997

I am adaptable and driven with years of experience in retail, where I developed strong communication skills, teamwork abilities, and a proven track record of meeting targets. After completing the Le Wagon bootcamp and starting a Bachelors in Computer Science, I am now passionate about transitioning into a career as a developer. With a serious commitment to continuous learning, I am eager to apply my new skills.

Sales Assistant

- Completed an intensive 2.5-month Le Wagon bootcamp to gain foundational skills in full-stack web development.
 - Focused on technologies such as Ruby, Ruby on Rails, JavaScript, HTML5, CSS3, and Git.
 - Built and deployed collaborative projects, showcasing problem-solving skills and an ability to work in agile teams.
 - Returned to a part-time role while pursuing a bachelor's degree in Computer Science.
 - Demonstrated strong organisational skills by successfully balancing work responsibilities and academic commitments.
 - Managed stock inventory at an offsite storage facility, ensuring efficient replenishment and consistently meeting operational targets.
 - Managed tables independently, providing attentive and friendly service to ensure customer satisfaction.
 - Took orders, served food and beverages promptly, and handled payments efficiently.
 - Maintained a clean and welcoming environment, assisted with setting up, clearing tables, and supported kitchen staff for smooth service.
 - Developed strong multitasking, communication, and adaptability skills in a fast-paced environment.
 - Oversaw stock operations across both store and offsite storage, ensuring seamless processing and inventory replenishment.
 - Maintained efficiency and met targets to prevent backlogs and ensure smooth workflows.
 - Led and coordinated a team, encouraging productivity to uphold high standards in stock management.
 - Undertook a 4 month journey through Southeast Asia, exploring Thailand, Cambodia, Vietnam, Laos, and Burma with a tour group.
 - Continued solo travel to Japan and Indonesia, developing adaptability, independence, and cultural awareness through diverse experiences and challenges.
 - Delivered excellent customer service by providing tailored advice, resolving inquiries, and creating a welcoming shopping experience.
 - Managed stock levels, organised stockroom inventory, and designed attractive displays to drive sales.
 - Processed transactions efficiently and handled returns professionally.
 - Demonstrated strong multitasking and organisational skills in a fast-paced retail environment.

Projects

- Bookflow**
Le Wagon – 2024
 - A mobile book tracking app that allows users to search for books by title or genre, add them to a personalised reading list, and mark them as read. The app supports user-generated reviews, displays book details, and keeps track of reading progress with visual charts, helping users manage their literary adventures effectively.
 - A team of four with a two week deadline, using Ruby on Rails, APIs and more.
 - PokeRent**
Le Wagon – 2024
 - A playful website that allows users to either rent or rent out Pokemon. Allows users to search by location and or specific Pokemon.
 - A team of four with a one week deadline, using Ruby on Rails, APIs, frameworks and more.
